

Here are some apps That I have used on my iphone and ipad that might be of some interest to some of you. These apps listed are all free, some have a paid version that will do more. If you do not see the app in the app store, you can google search the app and download the app through the website.

*Air Scanner*

Air Projector Free:

Air Sketch Free:

Slideldea

If you have wanted to use your smartphone or ipad like an Elmo check out **Air Scanner**.

To show pictures from your phone or ipad to the projector try **Air Projector**.

With **Air Sketch** you can draw and demonstrate right on your ipad and it will wirelessly show through your projector.

For a quick slideshow with pictures and text you can use **Slide Idea**.

The following pages describe the apps in more detail.

***Air Scanner:*** Project an image you see through your phone or ipads camera through the projector. Point the camera, lock in the picture on your phone or ipad and project the image. Could be used for showing students papers, art work, or show and tell so everyone can see up on the screen.

## ***Air Scanner***

Turn your iPhone or iPod Touch into a wireless HD document camera!  
Easily present hardcopy materials from books, magazines, or physical objects as part of your lectures or meetings. Great for show and tell.

Air Scanner wirelessly projects HD images from your device's camera to a web browser running on the same WiFi network.

Just fire up Air Scanner and type in the displayed URL in your web browser. The image will automatically update at up to 3-5 times per second.

**No extra hardware or additional client software is required.** You don't need an AppleTV or Chromecast dongle. PC, Mac, and Linux are all supported.

Air Scanner works wonderfully with a [DIY camera stand](#), which you can make in a few minutes.

## **Air Projector Free: Wireless Photo Album Transfer and Slideshow Presentations**

By Qrayon, LLC

### **Description**

Wirelessly project photos directly over WiFi to a standard web browser, in 3 easy steps:

STEP 1: Launch Air Projector.

STEP 2: Enter the URL in the web browser.

STEP 3: Pick a photo and it appears in the browser.

**NO DONGLES, CLOUD SERVICES, OR PLUG-INS**

Air Projector Free projects your recent photos wirelessly from your iPhone or iPod Touch to a web browser connected on the same local network. Works with Mac, PC, another iOS device, etc. No additional client software is required.

- \* Great for classroom or boardroom presentations
- \* Or sharing your photos with the whole family
- \* No AppleTV or other proprietary hardware or software needed!

## REAL-TIME PRESENTATIONS

Just fire up Air Projector Free and type in the displayed URL in your web browser. Flip through your photos on your iPhone and the remote display updates automatically.

Air Projector Free supports the newest versions of all the popular browsers: IE7+, Firefox 3.6, Safari 5, Chrome, etc. Earlier browser versions may not have all the required APIs to display correctly.

No WiFi? No problem. Check out our blog on how to set up an ad-hoc network.

Note: When you first launch Air Projector Free, it will ask permission to access your photos. This is needed in order to project (you can edit this in the iPhone settings, under Privacy).

Look for the Full Version of Air Projector to:

- + Project PDF files, including exported slide decks
- + Project Photo libraries
- + Use a virtual laser pointer
- + And more!

# Air Sketch Free: Wireless Smart Whiteboard for Classrooms, Presentations, Meetings, and Collaboration

By Qrayon, LLC

## Description

Turn your iPad into a wireless whiteboard! Project live sketches to a local computer in 3 easy steps:

STEP 1: Launch Air Sketch.

STEP 2: Open the indicated URL in a web browser.

STEP 3: Everything you draw appears in the browser, as you draw it.

## REAL-TIME DRAWING

Just fire up Air Sketch on the iPad and open the specified URL from any HTML5 compatible browser on another computer on the local network to see your sketches in real-time as you draw.

## NO DONGLES, CLOUD SERVICES, or PLUGINS NEEDED

Hook up your laptop to a projector to get an instant wireless whiteboard. No need to buy an AppleTV, ChromeCast, or other hardware.

There's no additional client software to install. Use Air Sketch at work, at home, or at conferences, with existing computers.

## WANT TO PRESENT SLIDES and MORE?

The Free Edition of Air Sketch supports basic drawing, but runs on the same engine as the Full Edition. Use it to test the performance on your network before getting the Full Edition.

The Full Edition of Air Sketch includes many, many more tools and capabilities, including the ability to wirelessly project and annotate PDF documents (including exported PDF slide decks) and pictures.

Look for a link in the sidebar, or the on the Developer Page.

## WORKS WITH STANDARD WEB BROWSERS

Air Sketch supports any HTML5-compatible browser, including Safari, Firefox, Chrome, and even another iPad, iPhone, or iPod Touch! They just need to be on the same local network.

No public WiFi? No problem. You can even use Air Sketch peer-to-peer with a computer via an ad-hoc network when a WiFi hotspot is unavailable (see our blog for the quick how-to).

## HAVE an IPHONE or IPOD TOUCH?

Check our Air Projector, our sister App, now available in the App Store!

Just Search for "Air Projector". It lets you wirelessly present slides and photos from your phone.

## WE BUILD APPS FOR PEOPLE WHO CHANGE THE WORLD

We have designed and built a whole suite of Apps that help you create and communicate. Check them out on our website.

*If you like Air Sketch, you will also want to grab a copy of Vittle, which turns your iPad into a Recordable Whiteboard. Check out our developer page for the link.*

**Wirelessly Project Sketches in Real-Time to Your Computer!**

## iPad Screenshots

**Works With Any Local Web Browser Without Dongles or Extra Hardware**

**Great For Quickly Illustrating Concepts, And Keeping Your Audience Engaged.**

**Free Yourself From the Podium, Present From Anywhere In The Room**

**Pass Your iPad Around and Let Others Easily Contribute Their Ideas**

## SlideIdea iPad App
